

Arizona Solar Summit

Arizona Solar Summit III

Game Changers

Shaping our Solar Future

Mark your calendars for Arizona Solar Summit III. This two-day event will highlight game changing efforts to move our state toward global solar leadership. Participants will spend Day One visiting select sites of their choosing in and around the Valley of the Sun. These bus excursions are designed to explore first-hand the ways technology and project development are shaping innovation in the development integration, and deployment of solar energy in our communities. On Day Two, at ASU SkySong, you will hear a recap of all site visits, reports from the Arizona Solar Summit Working Groups, and much more.

The Summit is again organized to maximize networking opportunities including an evening reception on Day One and several unique surprises to be revealed as the Summit gets closer. Please plan to join us!
